## SKILLS

Core Java

SQL

Advance Java

Spring/SpringBoot

## PERSONAL PROJECTS

IOT Based CLEANSWEEP - THE FLOOR CLEANING ROBOT (12/2021 - 04/2022)

- In this project work, a sweeping robot based on IOT was built. This cleaning robot is a hand-operated household electric machine.
- In manual mode, the Android device is used to perform the intended function and can be used to clean specific areas of the room. When a robot is moving manually, it will zigzag when it comes into contact with a wall or another object. The Android app can be used to wirelessly operate the robot as well.

### Payroll using Excel

- In this project I have used various Arithmetic functions of Microsoft Excel to create an employee payroll sheet which is used to calculate the necessary fields of a payroll system like minimum, maximum, and average salary for a particular office duration.
- There are situations when few employee works for overtime and hence this particular project could be of great help in such situation.
